

TERMINATOR V 3.0 - EXTERNAL STORAGE DATA WIPING SOFTWARE PACKAGE

IBY02 software package is provided for safe data wiping on external storage.

Description

IBY02 is installed with a customized setup kit, based on the HDD serial number.

The program can be operated on a user or administrator role. The user role performs data wiping and the administrator role uses the resulting information of the wiping process to issue a data wiping certificate.

The software can perform simultaneously multiple wiping processes and allows adding custom wiping methods.
